ABW's participation in the conference in Deblin

LAW

On 20-21.04.2023, Polish Air Force University in Deblin organized a conference entitled: "Security of Airports and Seaports". During the event, attention was paid to various aspects of the security of civil aviation and maritime transport, as well as possible human and environmental dilemmas and threats, among others, to key and critical infrastructure, including the general public zone.

Representatives of TPCoE and the Bureau of Forensic Research of Internal Security Agency gave a presentation on the first day of the conference on the dangers of malicious use of unmanned aerial vehicles, an important element of which was a film created in cooperation between security, defence and aviation-related structures.
