TPCoE training for Regional Branch of Social Insurance Fund (KRUS) in Koszalin

On 25 April 2023, a training session on anti-terrorist prevention was held on the premises of the Regional Branch of the Agricultural Social Insurance Fund in Koszalin.

The meeting was attended by representatives of the management of the branch and its field offices. In particular, a discussion was held on the 4U! social campaign implemented by the TPCoE, which defines recommended ways of proceeding in the event of threats of a terrorist nature. Significant attention was paid to the recognition of such situations at their preliminary stage. Subsequently, issues concerning behaviour during the direct occurrence of events qualified as terrorist acts, e.g. related to the so-called dangerous consignment, were addressed. Methods of action of an armed perpetrator were also discussed.

The training was widely received by its participants.
