TPCoE took part in the 2nd POLSECURE International Trade Fair

On 25-27 April 2023, a delegation of TPCoE represented Internal Security Agency at POLSECURE international trade fair for police and public safety. The event was held under the Honorary Patronage of the Minister of Internal Affairs and Administration.

The purpose of the event, organised by Tragi Kielce and the Polish Police Headquarters, was, among others, to exchange knowledge and experience between entities and institutions subordinate to the Ministry of Internal Affairs. This is an important element of the fair from the point of view of public order and state security. In addition, participants were able to learn about the offer of companies specialising in the production of special equipment, personal

protective equipment, rescue equipment and software for communication, command and control. During the fair, many entities advertised their training as well as consulting offers.

Internal Security Agency 's participation in the fair served to promote the interests of the service and the image of the Agency as an organ of the state responsible for internal security and having an impact - in cooperation with other uniformed institutions - on the current state of public order in the Republic of Poland. Participation in this year's edition of the fair was a continuation of the earlier involvement in the POLSECURE 22 International Fair, as well as during the International Defence Industry Exhibition held in Kielce in 2022. Three Internal Security Agency organisational units (CPT, BK, DBTI) were responsible for running the stand.

We invite you to read the materials available on the official website of the POLSECURE fair: https://www.targikielce.pl/en/polsecure
