TPCoE training for Ministry of Justice employees

TPCoE training for Ministry of Justice employees

On 20 April this year, TPCoE conducted a training on building information security policy and counter-terrorism prevention for employees of the Ministry of Justice.

The meeting was devoted to issues related to building an organisation's security policy in the context of current threat vectors, including terrorist threats. During the training, issues related to the vulnerability of persons and objects to unauthorised interference, among others, were discussed. In addition, topics related to the tasks of a security leader in an organisation and the relationship that exists between the security division and employees were addressed. There was also a focus on issues related to the risk analysis process and the impact tools used for unlawful information gathering were discussed. The meeting also provided knowledge on best practices and recommended behaviour when a terrorist incident occurs - based on the 4U! social campaign
