TPCoE training for Łódź Metropolitan Railway (Łódzka Kolej Aglomeracyjna)

Szkolenie CPT ABW dla ŁKA

On 11 May 2023, representatives of TPCoE conducted a training course on anti-terrorist prevention for the management of Łódź Metropolitan Railway. The thematic scope included both recommended actions in a kinetic situation, a broad spectrum of issues that are part of the area of building anti-terrorist awareness in society and information security.

The delivery of training to the above institutions is a direct expression of the Centre's mission, which is expressed in the shaping of a culture of security through building anti-terrorist awareness in the state

and society. At the same time, the above is an important element of TPcoE efforts to build the resilience of Polish institutions against extremist-terrorist threats and an attempt to increase their ability to respond to related incidents.
