TPCoE training for the Warsaw University of Technology

Szkolenie CPT dla Politechniki Warszawskiej

On 10 October this year, a representative of TPCoE conducted a training session for the Warsaw University of Technology.

During the event, issues related to the role of information in the context of building an optimal security policy for an organisation were discussed, including against the background of the current geopolitical situation. The lecture also included a characterisation of contemporary threats caused by hostile actions in the information area, to which universities and higher education institutions in the Republic of Poland may be exposed by virtue of their tasks.

A characterisation of contemporary threats influenced by the excess and massiveness of information in the environment relevant to institutions of education and science was also made.

The event was part of the promotion of knowledge in the development of security policy in the context of terrorist and information threats.
