TPCoE training for NAFTOR Sp. z o.o.

Szkolenie CPT ABW dla NAFTOR Sp. z o.o.

On 7 December 2023, a TPCoE expert conducted a training course on building a security policy against information threats in the context of counter-terrorism prevention, whose recipients were members of the staff of "Naftor" Sp. z o.o..

The lecture focused on aspects related to the role of information in the context of building an organisation's security policy, including issues related to the vulnerability of individuals and facilities to unauthorised interference from state actors and extremist-terrorist organisations. Attention was also given to the level of exposure and vulnerability of these facilities to terrorist or diversionary events.

A characterisation of the contemporary threats caused by the overabundance and massiveness of information was made, also distinguishing attacks affecting the damage to the image of companies and corporations. The training addresses recommended actions in the event of the detection of these security incidents.

The training is part of an awareness-raising campaign conducted by TPCoE for companies of strategic importance to national energy security.
