New cycle of TPCoE training for Polskie Elektrownie Jądrowe

Nowy cykl szkoleń CPT ABW dla Polskich Elektrowni Jądrowych

On 2 February 2024, a training course was held for the staff of Polskie Elektrownie Jądrowe.

During the training, recommended ways of behaviour in the event of a terrorist incident were discussed. In this context, the 4U! procedure was presented, as well as the mode of conduct in case of: an attack by a mass murderer, the danger of the perpetrators using explosive devices, as well as issues related to a dangerous shipment.

The training is an element of the measures taken by TPCoE to raise awareness among the personnel of companies of a strategic nature from the point of view of the energy security of the Republic of Poland.
