Security training for the Polish Air Navigation Services Agency

Security training for the Polish Air Navigation Services Agency

On July 09, 2024, experts of Counter-Terrorism Centre of the ABW conducted a training on counter-terrorism and counter-intelligence prevention for the Polish Air Navigation Services Agency.

The event was attended by members of the Board of Directors and employees of the Polish Air Navigation Services Agency, who were acquainted with the 4U! social campaign, which includes recommendations on how to deal with terrorist threats. In addition, the meeting covered issues related to the prevention of information threats in the context of dangerous contacts and possible areas of occurrence during their duties.

Counterintelligence prevention focused on aspects related to the role of information in the context of building an organization's security policy, including issues related to the vulnerability of individuals and facilities to unauthorized interference from state actors and extremist-terrorist organizations.

The event is part of the ABW's efforts to raise awareness and build a stronger security culture in authorities responsible for air traffic security.
