Training for AAN in Warsaw

Training for AAN in Warsaw

On 11 September 2024, CAT ABW experts conducted a training on anti-terrorism and cyber-terrorism prevention for the New Files Archive.

The event was attended by executives of the Archive of New Files, who were introduced to the 4U! public awareness campaign run by CAT ABW's Division IX, which includes recommendations for dealing with terrorist threats.

In addition, the meeting addressed issues related to cyber threats, including the risks that are associated with widespread access to the Internet and its use in professional practice and private life.

The event is part of CAT Division IX's efforts to raise awareness and a culture of safety as part of a preventive approach to threats.
