

# DRONES AS A THREAT

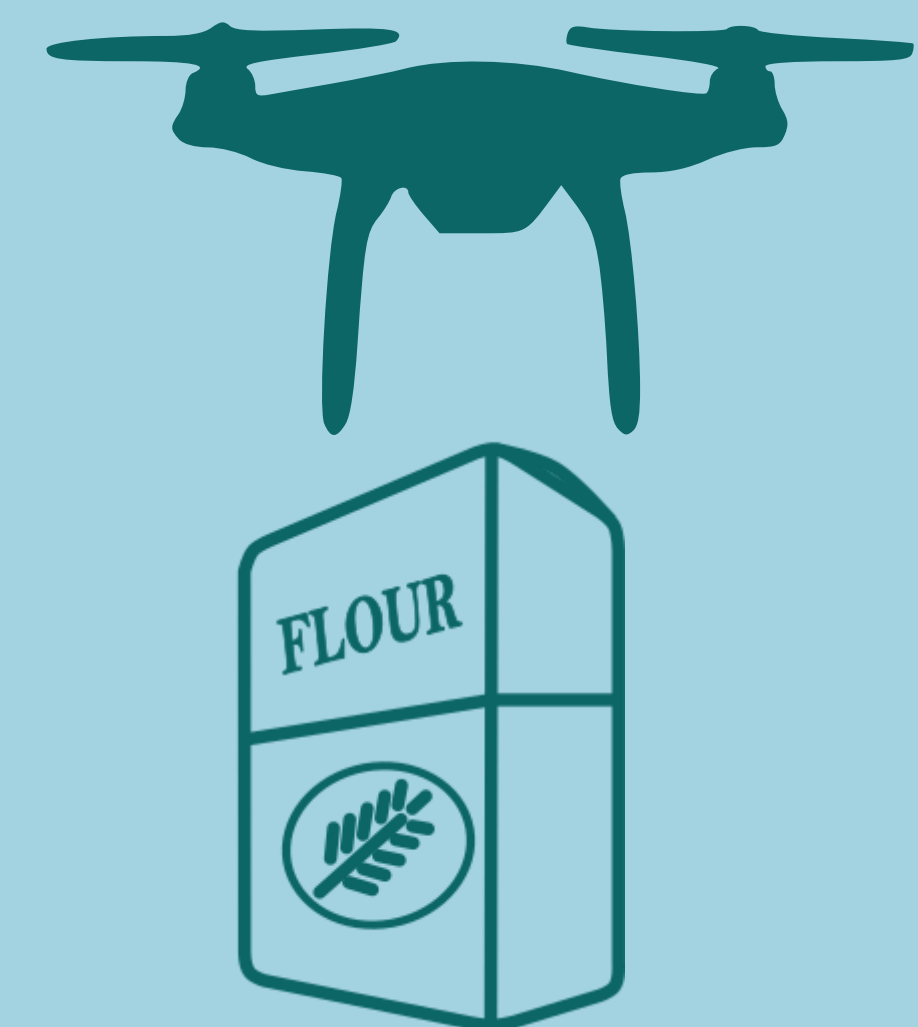

## Surveillance, privacy

- Collection of sensitive information
- Identify attack scenarios

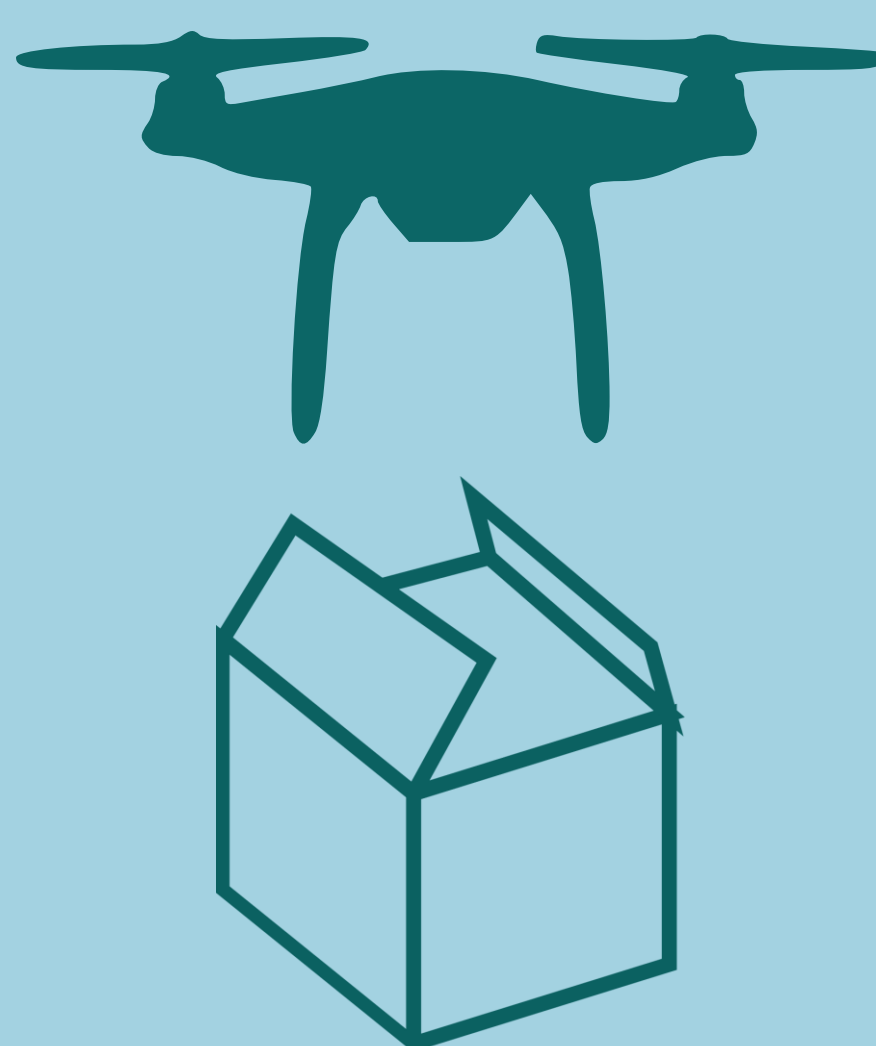

## Propaganda

- Broadcast attacks
- Filming protests
- Release leaflets over crowds

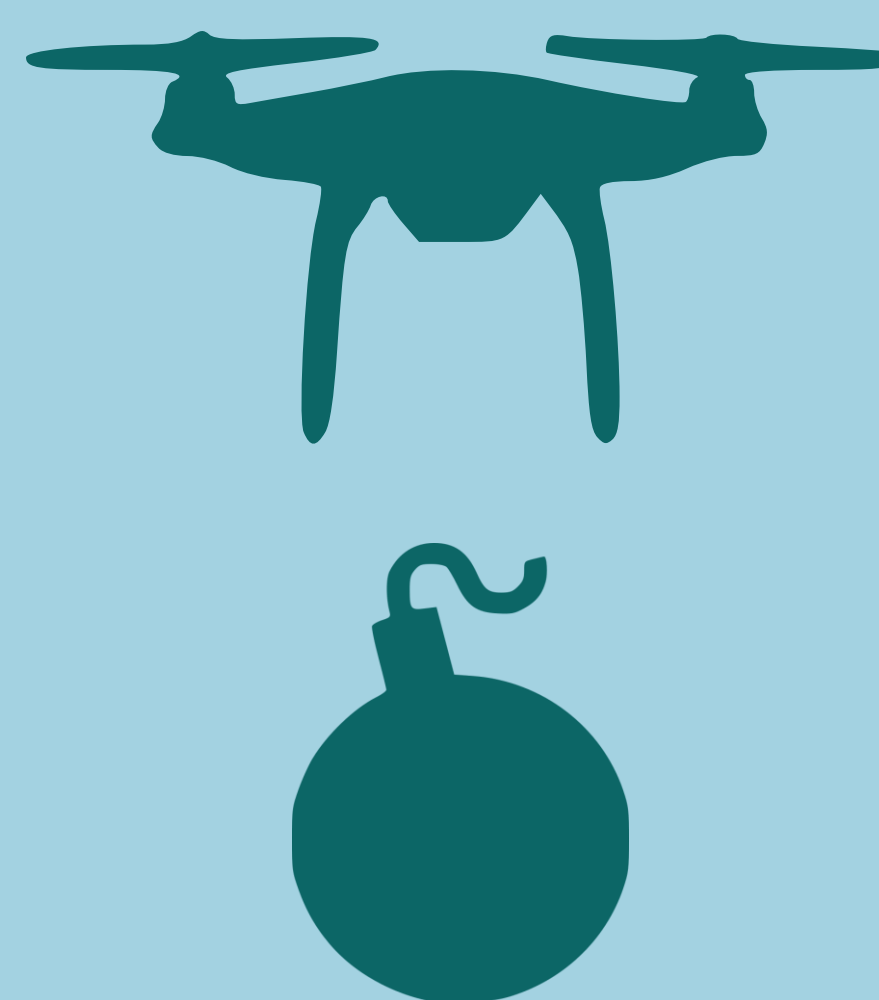

## Panic, obstruct

- Releasing harmless powder or liquids above a crowd
- Operating drones around airports to stop operations

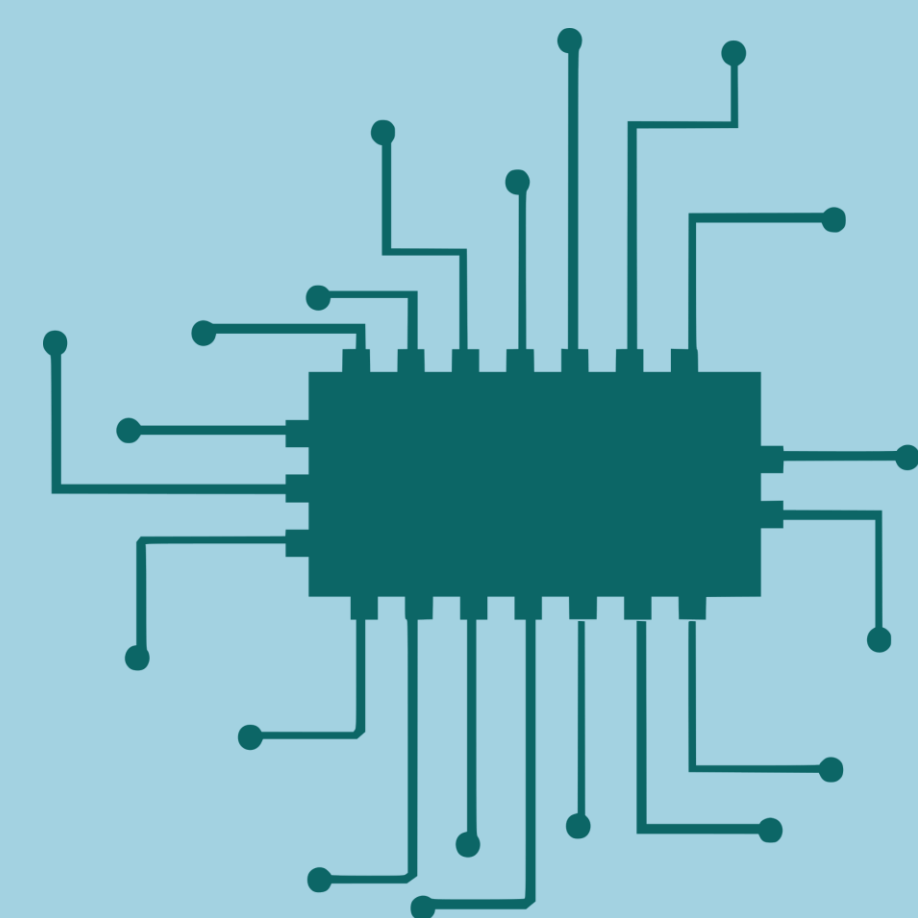

## Non-hazardous loads

- Smuggling over borders
- Transporting drugs into prisons
- Kamikaze attacks, impact

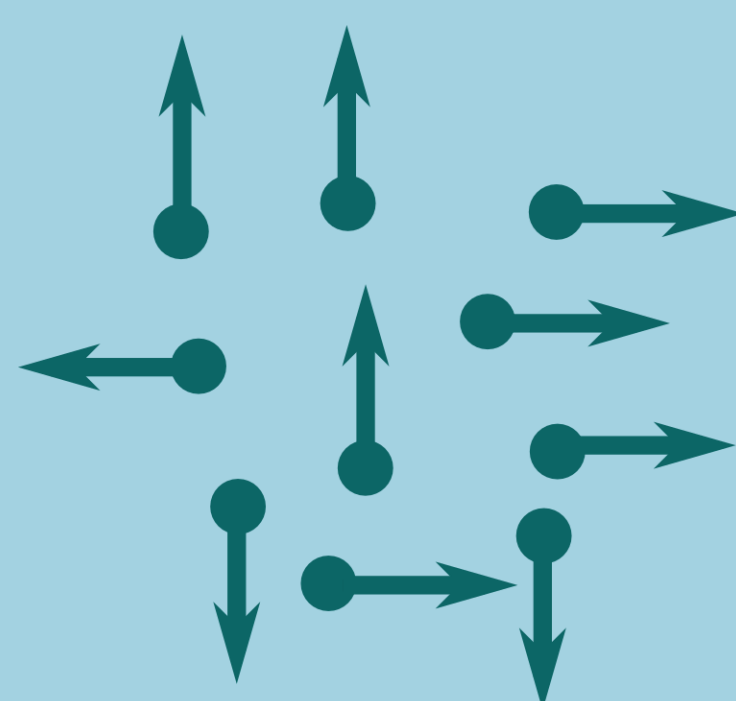

## Hazardous loads

- Explosives, firearms
- Release of CBRN, spraying chemicals
- Transporting explosives into critical infrastructures

## Cyber

- Hacking networks
- Setting up communication networks in restricted zones
- Disrupting/jamming communication
- Remote hacking node

## Combining technologies

- Swarming
- Automatic identification of targets e.g. by face recognition
